

THE POWDER ROOM  
LIVERMORE, CA 94550

**Microblading and Permanent Makeup Consent Form**

I \_\_\_\_\_ hereby request and consent to the application of permanent color and consent to have the following procedure done by Kimberly Findlen of The Powder Room

Please circle any that apply:

Eyebrows            Other: \_\_\_\_\_

Please read and initial the following statements:

\_\_\_\_ I understand that the process used to apply color is not a one-step process and requires more than one session to achieve desired results. I further understand that the fee includes my first visit only. Maintenance touch-ups are scheduled as needed and may vary from 6 months to three years. Fees from maintenance visits and pigment replacements are reduced but vary.

\_\_\_\_ I understand that with time, pigment can and will fade according to metabolism, skin type, medications, age, smoking, alcohol, sun exposure, Retin-A, and Glycolic Acids.

\_\_\_\_ I acknowledge that no guarantees have been made to me concerning the results of this procedure, and that the professional recommendation is for a Natural Look.

\_\_\_\_ I understand the nature of this procedure and possible complications or adverse effects that may occur as a result of applied pigments. I fully understand that this is a tattooing process; therefore it is not considered a science but an art.

\_\_\_\_ I understand pre and post procedure instructions and agree to strictly adhere to such instructions.

\_\_\_\_ I accept full responsibility for determining the color, shape, and the position of the pigment that will be applied. I understand that the actual color of the pigment upon application may be modified due to the color of my skin.

\_\_\_\_ I consent to having my photo taken for Before and After the procedure as well as allowing them to be posted for professional purposes on The Powder Room website/social media.

**\*The known possible complications from micropigmentation include but are not limited to: redness, swelling, bruising, dry patches and tenderness. Sometimes inconsistent color may occur and spreading of the pigments. It is normal to lose approximately one third of the color during the healing process. After most procedures, the color may appear too dark; in approximately six days the color will appear much lighter. Further treatments may be needed to correct balance.**
